The Department of Physics of the Faculty of Science at Universität Tübingen
invites applications for the position of a

Professorship (W3) for High Energy Astrophysics (m/f/d).

The position is expected to be filled as soon as possible.

The professorship is embedded in the research and teaching activities of the Institute for Astronomy & Astrophysics (IAAT) and of the Kepler Center for Astro- and Particle Physics. Filling this professorship is part of a development strategy to strengthen the focus on astrophysics and astro-particle physics at Tübingen University's Department of Physics.

The IAAT has been successfully developing instrumentation in the field of high-energy astrophysics for many years. The new professor is expected to continue and dynamically advance the existing participations in national and international projects. New initiatives and the continuation of own existing project participations are highly welcome. A willingness to develop collaborations with the existing research groups at the Kepler Center for Astro- and Particle Physics is expected. The astrophysical focus of the professorship should lie in the field of experimental and observational high-energy astrophysics and complement the existing professorship in Space-Based Astrophysics.

The future position holder will teach and develop courses in physics and astrophysics in the Bachelor's and Master's degree programs in Physics, the international Master's program in Astro- and Particle Physics, and the teacher education programs. This includes conducting introductory lectures and basic modules as well as specialized courses. The professor will participate to the usual extent in examinations and doctoral dissertations within the department. Active participation in the university's academic self-administration and in the committees of the Department of Physics and the Faculty of Science is expected. Non-German speakers are expected to acquire sufficient German language skills within a reasonable period to be able to fulfill their teaching obligations in the Bachelor's program and their committee work.

Required qualifications include a PhD or equivalent degree as well as postdoctoral qualifications and teaching experience equivalent to the requirements of a full professorship.

The University of Tübingen is committed to equity and diversity and actively promotes equal opportunities. Female academics, in particular, are explicitly invited to apply, as are applicants from outside Germany. Applications from equally qualified candidates with disabilities will be given preference.

General information on professorships, hiring processes, and the German academic system can be found here: https://uni-tuebingen.de/en/213700

Please submit your full application through the application site of the University of Tübingen at https://berufungen.uni-tuebingen.de by **31 January 2027.** Questions concerning the call for applications and the application portal can be directed to the Dean of the Faculty of Science at the University of Tübingen, Professor Dr. Thilo Stehle (career@mnf.uni-tuebingen.de).
